### **Founding Declaration**

### Growth, equity and participation

- The democratic election of 1994 opened a new era for South Africa. It was the decisive step in the transition to democracy. Now our country must meet the challenges of social development and economic growth.
- South Africa is a land rich in resources, with a strong and diversified economy. It has a people eager to make democracy work. It has a well-developed physical and financial infrastructure, such as transport, telecommunications and the banking system.
- South Africa is also characterised by severe inequality in income, skills, economic power, ownership and a skewed pattern of social development. This, together with large-scale unemployment and inadequate economic performance, has created major problems in our society.
- Government, organised labour, organised business and community-based organisations need to develop and strengthen cooperative mechanisms to address the challenges facing our new democracy. Our three defining challenges are:
  - Sustainable economic growth to facilitate wealth creation as a means of financing social programmes; as a spur to attracting investment; and as the key way of absorbing many more people into well-paying jobs.
  - Greater social equity both at the workplace and in the communities to ensure that the large-scale inequalities are adequately addressed, and that society provides, at least, for all the basic needs of its people.
  - Increased participation by all major stakeholders in economic decision-making at national, company and shopfloor level to foster cooperation in the production of wealth and its equitable distribution.
- Meeting these challenges is critical to the success of the Reconstruction and Development Programme.
- The National Economic Development and Labour Council (Nedlac) is the vehicle by which Government, labour, business and community organisations will seek to cooperate, through problem-solving and negotiation, on economic, labour and development issues and related challenges facing the country.
- Nedlac will conduct its work in four broad areas, covering:
  - Public finance and monetary policy;
  - Labour market policy;
  - Trade and industrial policy; and
  - Development policy.

Nedlac is established in law through the National Economic Development and Labour Council Act, No. 35 of 1994, and will operate in terms of its own constitution.

### **Nedlac's Mandate**

### The Nedlac Act requires the institution to:

- Strive to promote the goals of economic growth, participation in economic decision-making and social equity;
- Seek to reach consensus and conclude agreements on matters pertaining to social and economic policy;
- Consider all proposed labour legislation relating to labour market policy before it is introduced in Parliament;
- Encourage and promote the formulation of coordinated policy on social and economic matters;
- Consider all significant change to social and economic policy before it is implemented or introduced in Parliament; and
- Consider socio-economic disputes in terms of Section 77 of the Labour Relations Act (LRA).

### **Nedlac's Modus Operandi**

### Nedlac conducts its business through using one, or all, of the following tools:

- · Negotiations that seek to deliver formal consensus-based agreements on economic and social policy issues;
- Mandates: Nedlac constituencies participate in Nedlac on the basis of mandated positions;
- Consultations that seek consensus on proposed policy prior to it being tabled for negotiation or implementation;
- Conduct information-sharing sessions and seminars to report and evaluate progress on the implementation of social and economic policies;
- · Conduct research that guides the formulation and implementation of social and economic policy; and
- Resolving socio-economic disputes in terms of section 77 of the Labour Relations Act (LRA).

### **Strategic Overview**

This section provides a synopsis of the strategic framework of the organisation.

### Vision

To promote growth, equity and participation through social dialogue.

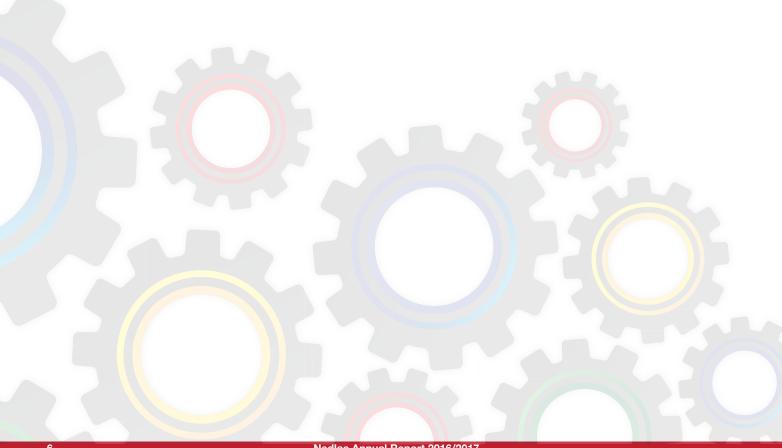

### Mission

To give effect to the Nedlac Act by ensuring effective public participation in labour-market and socio-economic policy and legislation, and to facilitate consensus and cooperation between Government, labour, business and the community in dealing with South Africa's socio-economic challenges.

### **Values**

We respect and promote:

- Accountability;
- Transparency;
- Integrity and ethical conduct;
- A spirit of partnership; and
- Problem-solving and consensus-seeking.

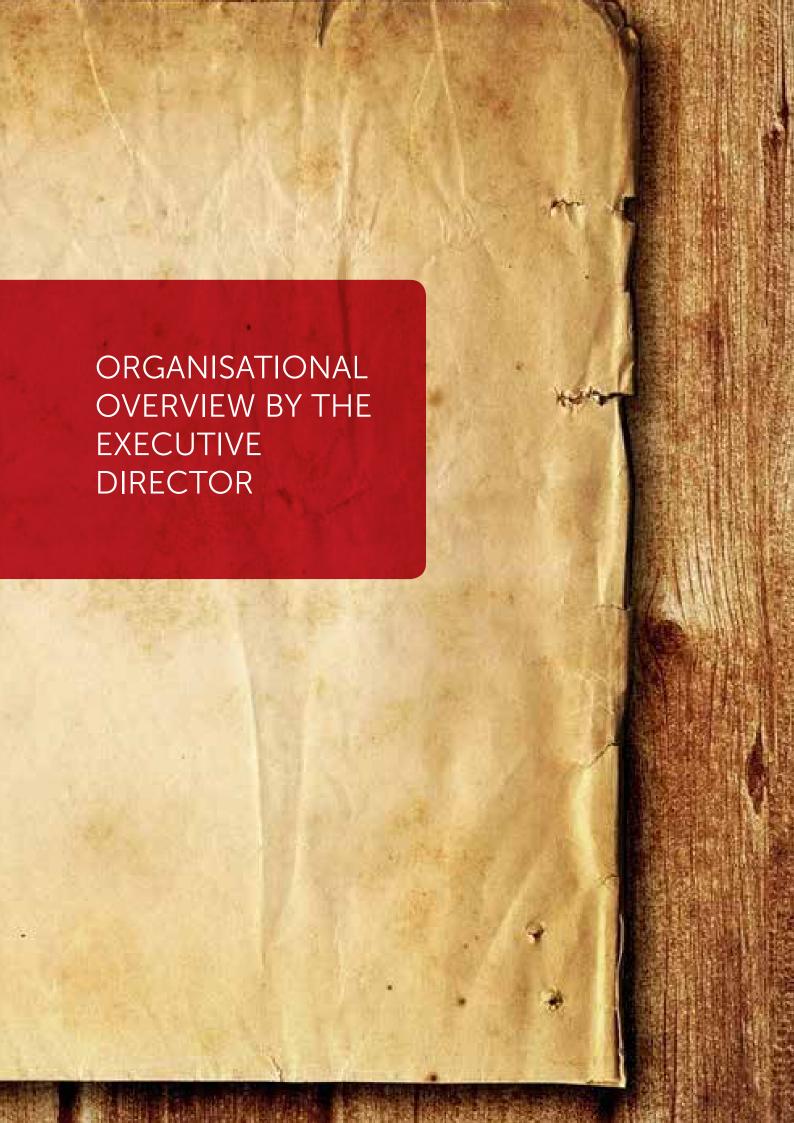

### **Legislative and other Mandates**

Nedlac is a statutory body which is governed and mandated by The National Economic Development and Labour Council Act, No. 35 of 1994.

Nedlac's work programme is largely determined by the legislative and policy programme of Government, as well as issues tabled by constituencies. These issues can be tabled at a Chamber, Management Committee (Manco) or the Executive Council (Exco).

Issues that are tabled at Manco or Exco are referred to the appropriate Chamber for negotiation or consultation: Trade and Industry; Public Finance and Monetary Policy; Labour Market; and Development. Issues of a crosscutting nature are dealt with by Manco and/or Exco, usually through special task teams.

### Madoda Vilakazi

The policy discourse in South Africa and by extension at Nedlac has been significantly under the spotlight in the year under review. Of particular interest are the concerns raised regarding poor economic growth and its specific impact on labour market stability. More worrying has been the bigger threat of the surge in industrial action to this stability. On the other hand, Nedlac only approved two protest actions in the last year, which happened at a Provincial level, i.e. Johannesburg and Cape Town. Some of the intended protest actions were resolved amicably within the Nedlac processes. These developments in the socio-economic environment sphere kept all Nedlac constituencies occupied with the aim to find workable and lasting solutions for the country.

Overall Performance: The performance achievement of 90% against the approved Annual Performance Plan is plausible and is the continuation of the trend of recent years and the achievement of an unqualified audit for the 2016/17 financial year is a cherry on top and a testimony of hard work and dedication in Nedlac. This achievement has eluded the organisation for the past two periods. were a few changes concerning staff movement but these did not result in any significant negative impact on the overall performance. This is attributable to standardised, efficient processes that have proven to be reasonably effective. Currently all approved key positions are filled and the work of Nedlac continues uninterrupted. The chambers and MANCO technical committees remain the central delivery platforms of Nedlac and the work of these structures continually improve.

The National Minimum Wage: Informed by the work emanating from the Ekurhuleni Declaration of November 2014, the National Minimum Wage discussions were concluded and the agreement signed by the social partners in February 2017, the agreed minimum wage was R20 per hour. No worker in South Africa should be paid below this floor. The first of May 2018 was the agreed implementation date. This would enable the social partners time to fine tune remaining detail on the matter, and enable government and ultimately parliament to engage in the formulation of new legislation and amendment of existing legislation in order to facilitate the seamless implementation of the National Minimum Wage.

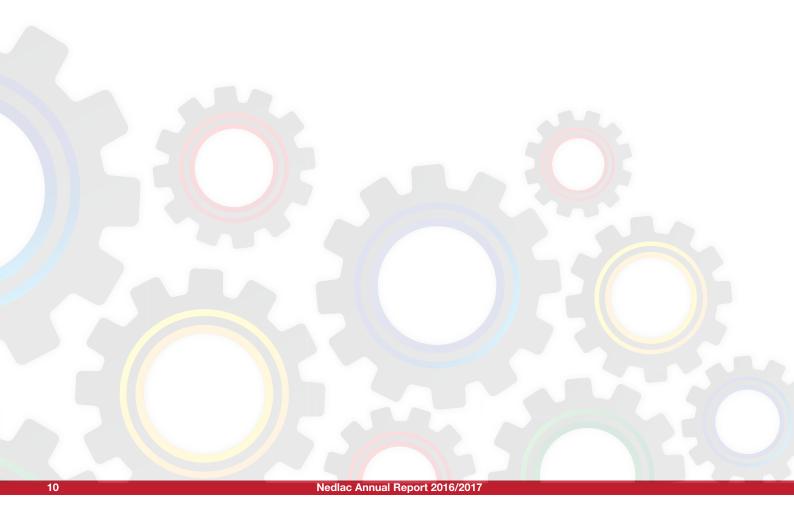

Comprehensive Social Security: This is another key policy proposal that made its way to Nedlac in the latter part of the financial year. Government tabled its position paper on Comprehensive Social Security (CSS) and the task team was immediately set up to process this work. The primary purpose of CSS is to ensure that all vulnerable South Africans are covered by the social security net, and ensure that there is congruence and consolidation of different government efforts of social security provision, thereby eliminating duplication and wastage. The timeline given for this work is two years.

National Health Insurance: The speedy but prudent implementation of NHI is critical given the time lag between policy formulation and implementation, which is about 25 years. The presentation of the proposals by the Minister of Health in the last quarter of the financial year was very instructive and Nedlac awaits the formal commencement of deliberations on NHI. The introduction of NHI will contribute immensely to the well-being of citizens, and the equitable provision of health care in the Republic for all who live in it. This is indeed a revolution.

The uneven distribution of wealth in various sectors of the economy remains a challenge that continues to widen the socio-economic gap whilst slow economic growth remains a great challenge. The growth rate of the economy in line with the

National Development Plan projections of 5% to 6% is an imperative if the country has to implement effectively the NMW, CSS and the NHI. The inability of the labour market to absorb new entrants also exacerbates this debilitating state in the economy. Nedlac will continue to maintain the current momentum gained in this past financial year by, working closely with Social Partners in facilitating constructive and inclusive social dialogue on issues that will contribute positively towards building a successful democratic society.

I wish to acknowledge the selfless contribution of social partners through the chamber convenors, overall convenors and the Committee of Principals to the smooth running of the work of Nedlac and thus supporting the governance structures in carrying out their mandate. The Nedlac staff is also highly appreciated for their industry and dedication to the mandate of our institution.

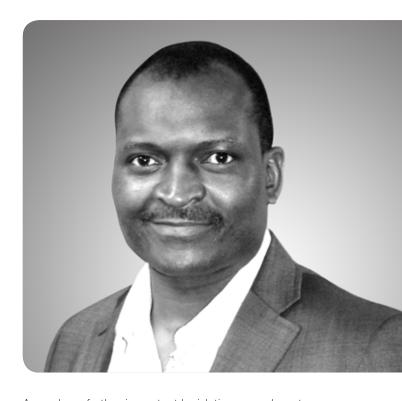

### MESSAGE FROM THE OVERALL CONVENOR - BUSINESS

### Kaizer Moyane

The 2016/2017 financial year carried so much promise for South Africa. It was a year in which key players in the economy, ably led by the then finance minister, Pravin Gordhan, pulled all stops to stabilise and improve the economy, especially so that international ratings agencies would positively reassess their views of us as a country. The effort saw unprecedented levels of cooperation between leaders of government, business and labour movements, with the full support of the Nedlac constituencies.

It was also a year that saw significant progress in Nedlac on various policy and legislative matters, resulting in some historic agreements in some cases. The highlight was the conclusion of an agreement on the broad principles of a National Minimum Wage (NMW), which will see a national floor established for most vulnerable workers at R20 per hour when it is implemented from May 2018. This is a significant milestone in our labour market, one that was carefully considered and balanced against the urgent need for the country to accelerate employment creation efforts through inclusive growth.

Stabilising the labour market was another priority for the Nedlac constituencies, which emanated from the Ekurhuleni Declaration. Along with the NMW agreement, senior leaders of all Nedlac constituencies spent countless hours over months to address some of the weaknesses of the labour market arrangements, and emerged with a package of interventions that will enhance stability in the labour market and improve investor sentiment in our economy. I have no doubt that the constituencies will continue to dedicate their efforts this year to finalise the legislative arrangements necessary to implement the NMW and labour market stability agreements.

A number of other important legislative amendments and policy proposals were also considered and/ or finalised during the period under review. These include the Airports Company Amendment Bill, the National Road Safety Strategy, the Communal Property Association Amendment Bill, the Aquaculture Development Bill, the Air Traffic Navigation Services Amendment Bill, to name just a few. Fruitful engagements and briefing sessions also took place with key Government departments and ministries on progress and challenges in implementing some of the policies and legislation agreed in Nedlac, e.g. the Employment Tax Incentive Act, which was meant to stimulate employment of young people. The volume of work delivered is testimony not only to the importance of Nedlac as and institution of social dialogue, but also to the dedication of all constituencies to make South Africa work.

Understanding the serious challenges we face as a country, the Business constituency also undertook several initiatives to tackle the problem of growing unemployment, particularly among the youth. An example is the learnership and internship initiative that saw a number of businesses giving work exposure to significant numbers of unemployed young people. With young people dominating the ever expanding pool of the unemployed, in a sluggish economy, I have no doubt that Nedlac constituencies will have to double their efforts this year and beyond if we are to make any meaningful inroads into the unemployment crisis.

Looking ahead, the continually changing nature of work and the fast emerging concept of the "future of work" should become a topic of extreme relevance for Nedlac, where parties will need to explore appropriate policy choices. Discussions on Comprehensive Social Security and Protection are also likely to resume in earnest. These discussions

will take place against the backdrop of tough economic conditions following the country's recent downgrades by international credit ratings agencies. However, I am confident that Nedlac will approach these complex and important matters with the same level of dedication that the country has come to expect from the institution.

Finally, thanks go to all those who make Nedlac the institution of vibrant social dialogue that it is, including members of the secretariat, leaders of government and social partners, as well as participants in task teams that saw many agreements in this year. In particular, a heartfelt thank you to all the Business representatives who participated in the various Nedlac structures to bring the voice of Business in discussions.

### MESSAGE FROM THE OVERALL CONVENOR - COMMUNITY

### **Dumisani Mthalane**

One of the important grassroots social dialogues undertaken in South Africa recently was under the auspices a High Level Panel on the Assessment of Key Legislation and the Acceleration of Fundamental Change, established in 2016. In many ways, these grassroots social dialogues complemented the work taking place at NEDLAC as they were aimed at taking stock of the impact of legislation insofar as it advances or impedes progress in addressing the triple challenges of poverty, unemployment and inequality. The Panel has been assessing the possible unintended consequences, gaps and unanticipated problems in post-apartheid legislation, as well as how effectively laws have been implemented. It will propose appropriate remedial measures to Parliament including the amendment, or repeal of existing legislation or additional legislation where necessary. Its recommendations will find way on the agenda of NEDLAC in years to come.

These grassroots social dialogues underpin the significance of inclusion of community voices in policy and legislation debates about shaping the national agenda on a number of issues that are aimed at building sustainable economic development, a strong social cohesion, and positioning South Africa as a significant player in the global economy driven by innovation and competition. However, as the Community Constituency, we maintain our position that community voices in social dialogue cannot have limping validity, valid one day, invalid the next, depending upon changing circumstances. Community voices deserve full recognition and representation in all NEDLAC Chambers, especially at a time when South Africa is grappling with serious challenges of protracted economic stagnation and the consequences of poor grading by the international rating agencies.

While there is no single approach that can provide an answer to ensuring meaningful participation in social dialogues taking place on various platforms, we strongly believe that government must lead the way by provision of adequate resources to the NEDLAC Community Constituency in order to better position it as a valuable partner.

Also, we note that land reform continues to be one of the central policy and legislative matters under consideration at NEDLAC. Government's early vision of land reform emphasised its multiple objectives: addressing dispossession and injustice; creating a more equitable distribution of land; reducing poverty and assisting economic growth; providing security of tenure; establishing sound land administration; and contributing to national reconciliation. Settlement and tenure security in informal settlements and urban areas were also to be supported. The primary beneficiaries of land reform were defined as the 'rural poor', but included a number of diverse interest groupings within that broad category: the victims of land dispossession, farm workers, labour tenants, communal area residents, people living in informal settlements, small-scale farmers, women and youth. A number of other important debates on aspects of economic development and land reform will continue to dominate the policy and legislative agenda at NEDLAC. These include:

- agricultural policies, including deregulation and liberalisation, and their impacts on land reform
- the need for a national programme of small farm support
- water allocation reform and irrigation
- whether or not legislation to protect the land rights of labour tenants is likely to be effective
- the advantages and disadvantages of strategic partnerships between communities and private sector companies within restitution and redistribution projects
- land reform's contribution to reducing gendered inequalities
- the potential of rental markets in communal areas
- urban land reform, including ant-eviction legislation, and its contribution to reducing spatial inequality in towns and cities
- the most effective institutional arrangements for governing land tenure in the former 'Coloured' rural reserves
- the potential of municipal commonage land

These debates are entering another dimension while also being framed by a host of land laws passed and began to be implemented over the years, aimed mainly at securing land tenure rights. The road ahead is full of challenges despite farmworkers and dwellers being afforded protection from arbitrary evictions, through the Extension of Security of Tenure Act of 1997. The occupation and use rights of labour tenants have been afforded protection, but tenants or former tenants could also apply for ownership of the land they occupied, as provided for by the Land Reform (Labour Tenants) Act of 1996. Communal Property Associations (CPAs) allowed groups to hold restored and redistributed land, and many were formed with the help of consultants. However, most did not receive much support thereafter, little oversight was exercised by government, and many have become somewhat dysfunctional. Communal tenure reform was highly politicised as a result of the lobbying power of chiefs, and progress in developing a policy framework was slow and incomplete, with no new legislation adopted by mid-1999.

Most communities are adversely affected by the reality that agricultural policies remain uncoupled from land policies, and were initially focused on deregulation and liberalisation of the sector. State subsidies for credit, inputs and exports were abolished and the single channel marketing system, involving fixed prices, was dismantled. These measures were portrayed as progressive because they removed state support for privileged white farmers, but large-scale programmes of support for small-scale black farmers and land reform beneficiaries, despite being identified as a key need, are notable by their absence.

The current mandate of government requires redoubling of efforts to achieve progress in addressing the triple challenges of poverty, unemployment and inequality. The Community Constituency remains committed to continue playing a meaningful role at NEDLAC, enhanced by community voices at grassroots level as well as processes that provide for meaningful engagement of local communities social dialogue.

### MESSAGE FROM THE OVERALL CONVENOR - GOVERNMENT

### Virgil Seafield

A cursory examination of the NEDLAC annual reports over the last few years provides a telling reference to the role of the organisation in both informing the discourse between social partners on important policy issues and also contributing to finding solutions to policy challenges. In the 2010 Annual Report a key issue was the participation of labour in the National Manpower Commission (NMC), in 2008 the National Industrial Policy framework was considered. In late 2008 and early 2009, the global financial crisis developed into a global economic crisis.

The social partners at NEDLAC were requested by the then President Motlanthe to develop a national response to the crisis. The social partners emerged with a National framework to respond to the crisis called "the Framework for South Africa's Response to the Global Economic Crisis." The record of NEDLAC is replete with creative responses, through social dialogue, to emergent realities and policy changes.

More recently however the organisation has been faced with a broader challenge in developing cooperative approaches to addressing socioeconomic challenges – in the context of a discourse that is highly polarised and ideological. The prospects for effective national level tripartite engagement has been weakened by the increase in community based conflict, inter union rivalry and intra union divisions as well as challenges within the business constituency.

Yet NEDLAC has emerged again as the champion of social dialogue in the policy formulation arena. Over the last year the organisation facilitated ground breaking agreements on the labour relations front. Central to the agreement on a National Minimum Wage is not the level of the agreed wage but an honest and sincere attempt by all social partners to engage on the issue of growing inequality and addressing, in a constructive manner, the levels of poverty in our country. The agreements reached on

labour stability for government are not only about the detail but how this would contribute towards creating an investor friendly economic environment.

We saw an increased commitment to overhaul the social security dispensation when government submitted its proposals on social security reform. But more significant is the emergence of a collective narrative in addressing the problems facing our country that led to the recent downgrades of South Africa's credit rating.

Has NEDLAC maintained its relevance as a platform of social dialogue in policy formulation? I would argue that it has.

A challenge for the near future may be how to respond to "the new normal" where the focus of government has clearly been articulated by President Zuma as being "implementation" oriented.

### MESSAGE FROM THE OVERALL CONVENOR - LABOUR

### **Bheki Ntshalintshali**

When the global economic crisis hit us in 2009, many of us thought that such crisis would take a short time to recovery mainly because we believed that South Africa's fundamentals were firmly in place. Eight years later our country's economic status was downgraded to a junk State. As if this was not enough on the 6th June 2017, South Africa entered into recession. The unemployment level hit 37 percent level which equals to 9.3 million unemployed people, this is a crisis. It is both socially unsustainable and politically unstable. The global perception about our country as a destination for investment has been dented heavily in particular by "corruption" and it would take courageous leadership to address this rather than dismiss it.

There are many questions that need answers. How did we arrive at this level of crisis? How far are we from the dream of the National Development Plan (NDP) that promises us that by 2020 the unemployment level would have been halved? Why inequality is deepening? Why Nedlac as an institution of social dialogue is unable to intervene and provide some solutions?

These are not easy questions; they need deep reflection on Nedlac to respond to this crisis. In 2009 we developed South Africa Response to the Global economic crisis and many countries took our responses and implemented them, today those countries are in a better economic situation than us. The International Labour Organisation used our responses and developed a Jobs Pact. So what went wrong with us, why such grand ideas have not worked for us? Simply, we did not implement them we hold on the view that fundamentals were in place. In 2009, we pointed out all what needed to be done including credible policies in the New Growth Path, IPAP, and 9 Point Plan etc. But the opposite happened as many government departments outsourced work for example the health workers, expanded public works programmes, increasing non-standard forms of employment which posed challenges for freedom

of association and collective bargaining. Institutions like the CCMA, Bargaining Councils, Nedlac, inspectorate under the department of Labour came under immense pressures as they tried to give support to labour relations. In our country the majority work continues to be carried out in the informal and rural economies in which the ability of workers to organise faces major challenges.

Government and social partners failed to provide leadership. Both employers and workers organisations were weakened by their own internal divisions. Collective bargaining systems were weakened. Nedlac as strong legal and institutional framework for labour relations could not provide efficient labour administration of a conducive and enabling environment to respond to this crisis.

We are deliberate in raising the negatives first as an attempt to send the message that Nedlac constituents can do more in providing new ideas and addressing the complex questions. It must be remembered that it was Nedlac who stood up in developing the South Africa Response to the Global economic crisis. But it was also Nedlac who allowed the NDP to be adopted in the form it is, which labour is not happy about.

In the last two years Nedlac has stood up again under the leadership of the Deputy President Ramaphosa to tackle the wage inequality and positive indicators are giving us confidence that we are on right course. Our dream of a legislated national minimum wage as envisage in the Freedom Charter is about to be realised, the discussion on the introduction of comprehensive social security is about to begin, laws on strengthening of collective bargaining are about to be finalised.

However, Nedlac has to move with the required speed if it has to claim its relevance in society. It has to address the issue of wage inequality in particular the executive pay. This is another time bomb waiting to explode and its impact will be huge as many workers believe that this wage gap is driven by greed. We cannot afford not to address this matter of widening inequality. This must be accompanied by addressing the issue of unemployment in particular of women and youth, investment strike by employers and corruption both at the private sector and in government, etc.

It is also very important to remember our previous resolution that for Nedlac to work optimally it would need all constituents to cooperate by sending senior leadership with the requisite skills and knowledge of relevant subject and respect the Nedlac protocol and meeting the deadlines in finalising its work. Also to be asked is whether Nedlac capacity both in terms of resources and capacity is adequate to play fully its role, its credibility and enjoy trust by the constituents it serves.

### **Company Secretary**

Mr Madoda Vilakazi

### **Overview of Public Entity's Performance**

### 1.1. Service Delivery Environment

Nedlac remains an apex organisation for Social Dialogue in South Africa. This is the position which the organisation needs to work hard every day to maintain. This position will be sustained if the organisation adheres to its core mandate and continually improve its service delivery model. The fundamental role of Nedlac is to facilitate consensus between the social partners on social and economic policy and legislation, through social dialogue and engagement. This will require focused attention on the capacity, conduct and commitment of the social actors involved. It also calls for strong leadership and a paradigm shift away from the culture of adversarialism and a greater focus on building relationships and a network of trust and collaboration.

The Chambers and the MANCO Technical Committees are the central service delivery platforms of Nedlac. These structures have delivered exceptionally well on their responsibilities. This is signified by the 90% performance achievement of the annual target as enshrined in the Annual Performance Plan. The work of Nedlac is executed within a political and economic environment, which is quite uncertain. At the tail end of the reporting period the country was downgraded by Standard & Poors and Fitch Ratings agencies to sub-investment grade, commonly known as junk status. This necessitated the organisation to coordinate a special Exco meeting, which was chaired by the Deputy President, Mr Cyril Ramaphosa, to come up with strategies to avoid further downgrades and ensure a speedy return to investment grade. This work will continue going into the next financial year and beyond.

The other major work of the organisation has been the National Minimum Wage (NMW) and Labour Relations reforms, which have been discussed by the social partners under the Wage Inequality Technical Task Team (WITTT) and the Labour Relations Technical Task Team (LRTTT) as well as the Committee of Principals. The agreement was signed by the social partners in February 2017. The implementation of the NMW will be in May 2018.

### 1.2. Organisational Environment

Engagements at Nedlac are guided by the following protocols:

- Nedlac Protocol for Tabling Issues at Nedlac
- Section 77 Protocol
- Protocol on Working Relationship between Nedlac and Parliament

The Nedlac Protocol provides the basis for consideration of matters that are tabled at Nedlac. In this regard the Nedlac Protocol provides the timeframes within which engagements should be finalised.

The organisation experienced a very high turnover of staff in the financial year under review. This in part is occasioned by the budgetary constraints which cause the organisation to be unable to compete in the labour market. This has been identified in the Strategic Plan and is being addressed. Unfortunately, this phenomenon inhibits the consistent growth and depth of knowledge and skills to execute Nedlac's mandate. It also erodes the institutional memory that is clearly needed.

Nedlac will prioritise the following in the financial year 2017-2018:

- 1.2.1. Enhance communication and outreach, which would entail forming strategic partnerships with other communicators, and healthy relationships with the media. It is imperative to get activities of Nedlac distributed widely.
- 1.2.2. The National Minimum Wage (NMW) will remain one of the key deliverables for Nedlac, and also ensuring that the work that flows from the NMW lives beyond the implementation date of May 2018.
- 1.2.3. Comprehensive Social Security (CSS) will form a pivotal part of Nedlac's work, ensuring that South Africans who are currently outside the security net are also covered. The position paper of government had already been tabled and the Task Team is busy at work.
- 1.2.4. The capacity of the secretariat to attract and retain highly skilled staff to carry out the mandate of Nedlac will finally be addressed. This will entail introducing the salaries and benefits concomitant with work Nedlac does, and the level of importance of the organisation to the nation. This is already anticipated in the 2015 2020 Strategic Plan.

### **1. During June 2014:**

 State of the Nation Address (SONA), President Jacob Zuma called on Nedlac Social Partners - under Deputy President Cyril Ramaphosa's leadership - to address Wage inequalities, the National Minimum Wage; and violent and protracted strikes.

### 2. At the Nedlac **Summit convened on 05 September 2014,**

- Announcement that a Labour Relations Indaba will be convened on 04 November 2014 to commence the process of engagement on a National Minimum Wage.
- The Nedlac Ekurhuleni Declaration was adopted at this later meeting. The Declaration comprised principles that guided an engagement process, under the auspices of Nedlac and the stewardship of the Deputy President.

### 3. November 2014: **Labour Relations Indaba**

 Gave birth to the Ekurhuleni Declaration where constituencies acknowledged challenges of unemployment, poverty and inequality facing South Africa and the economy.

The Technical Task Team on labour relations (LRTTT) was mandated to engage on the following issues:

 Promoting employment, labour market stability, including the right to strike, protracted strikes; violence, collective bargaining and the role of the State; employment, vulnerability and social protection.

Technical Task Team on Wage Inequality (WITTT)

• The Technical Task Team on Wage Inequality was mandated to focus on addressing wage inequality

### 5. August 2016:

The DP in consultation with Nedlac social partners, appointed a Panel of Advisers to assist Nedlac in setting the level of the National Minimum Wage, taking into account work done so far by Nedlac technical task-teams.

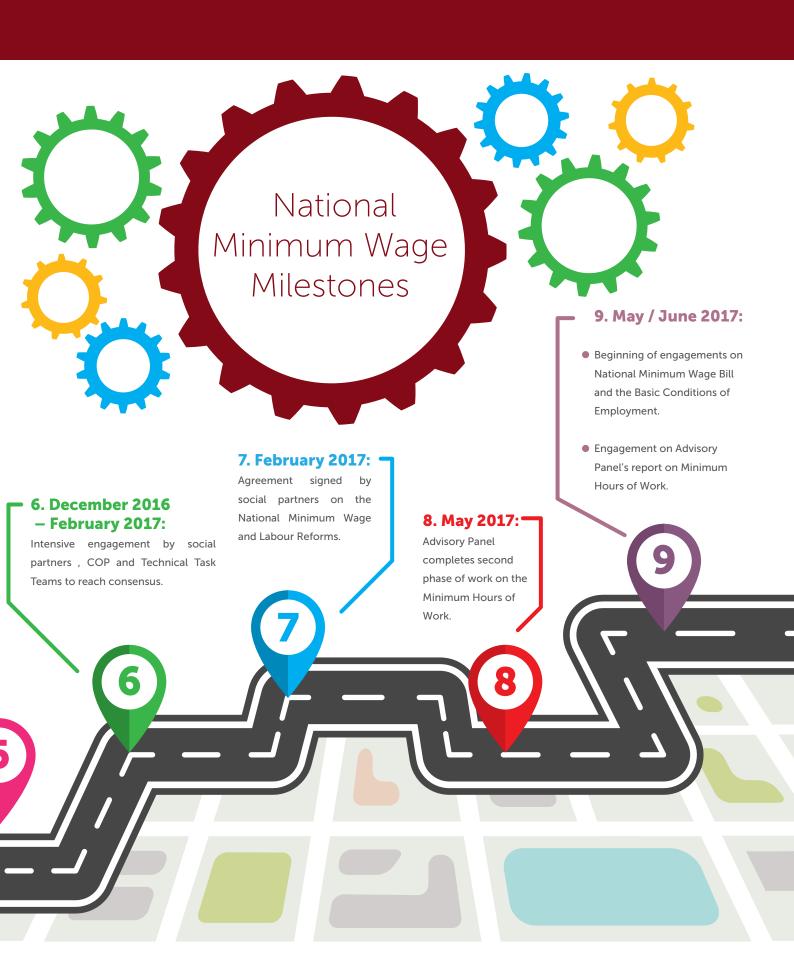

### 25 November 2016:

Advisory Panel presents its report to Nedlac EXCO/

### 4. April 2015 -**August 2016:**

- Beginning of engagement on the work of the LRTTT and the WITTT reporting to the Committee of Principals (COP);
- Technical COP working group was

## **LEGISLATIVE AND OTHER MANDATES**

Nedlac is a statutory body which is governed and mandated by The National Economic Development and Labour Council Act, Act 35 of 1994.

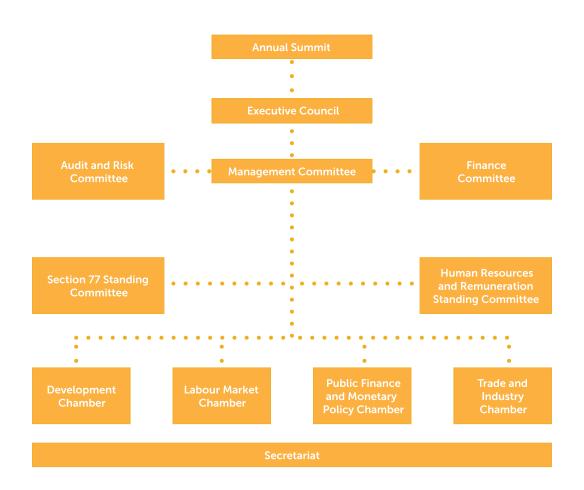

Nedlac's work programme is largely determined by the legislative and policy programme of government as well as issues tabled by constituencies. These issues can be tabled at a Chamber, Management Committee (Manco) or the Executive Council (Exco).

Issues that are tabled at the Manco or Exco are referred to the appropriate Chambers for negotiation or consultation: Trade and Industry; Public Finance and Monetary Policy; Labour Market; and Development. Issues of a cross cutting nature are dealt with by the Manco and/or Exco usually through special task teams.

There have been no changes in the legislative mandate of Nedlac.

# Report of the auditor-general to Parliament on National Economic Development and Labour Council

## Report on the audit of the financial statements

#### **Opinion**

- I have audited the financial statements of the National Economic Development and Labour Council (NEDLAC) set out on pages 93 to 141, which comprise the statement of financial position as at 31 March 2017, and the statement of financial performance, statement of changes in net assets, cash flow statement and the statement of comparison of budget information with actual information for the year then ended, as well as the notes to the financial statements, including a summary of significant accounting policies.
- 2. In my opinion, the financial statements present fairly, in all material respects, the financial position of the public entity as at 31 March 2017, and its financial performance and cash flows for the year then ended in accordance with the South African Standards of Generally Recognised Accounting Practice (SA Standards of GRAP) and the requirements of the Public Finance Management Act of South Africa, 1999 (Act No.1 of 1999) (PFMA).

#### **Basis for opinion**

- I conducted my audit in accordance with the International Standards on Auditing (ISAs). My responsibilities under those standards are further described in the auditor-general's responsibilities for the audit of the separate financial statements section of my report.
- 4. I am independent of the entity in accordance with the International Ethics Standards Board for Accountants' Code of ethics for professional accountants (IESBA code) together with the ethical requirements that are relevant to my audit in South Africa. I have fulfilled my other ethical responsibilities in accordance with these requirements and the IESBA code.
- 5. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

#### Responsibilities of the accounting authority for the financial statements

- 6. The accounting authority is responsible for the preparation and fair presentation of the financial statements in accordance with the SA Standards of GRAP and the requirements of the PFMA and for such internal control as the accounting authority determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.
- 7. In preparing the financial statements, the accounting authority is responsible for assessing NEDLAC's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless there is an intention either to liquidate the public entity or to cease operations, or there is no realistic alternative but to do so.

#### Auditor-general's responsibilities for the audit of the financial statements

- 8. My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
- 9. A further description of my responsibilities for the audit of the financial statements is included in the annexure A to the auditor's report.

## Report on the audit of the annual performance report

### Introduction and scope

10. In accordance with the Public Audit Act of South Africa, 2004 (Act No. 25 of 2004) (PAA) and the general notice issued in terms thereof I have a responsibility to report material findings on the reported performance information against predetermined objectives for selected objectives presented in the annual performance report. I performed procedures to identify findings but not to gather evidence to express assurance.

- 11. My procedures address the reported performance information, which must be based on the approved performance planning documents of the public entity. I have not evaluated the completeness and appropriateness of the performance indicators included in the planning documents. My procedures also did not extend to any disclosures or assertions relating to planned performance strategies and information in respect of future periods that may be included as part of the reported performance information. Accordingly, my findings do not extend to these matters.
- 12. I evaluated the usefulness and reliability of the reported performance information in accordance with the criteria developed from the performance management and reporting framework, as defined in the general notice, for the following selected programmes presented in the annual performance report of the public entity for the year ended 31 March 2017:

Programmes	Pages in annual performance report
Programme 2 – Core Operations	34 - 69
Programme 3 – Capacity Building	70 - 71

- 13. I performed procedures to determine whether the reported performance information was properly presented and whether performance was consistent with the approved performance planning documents. I performed further procedures to determine whether the indicators and related targets were measurable and relevant, and assessed the reliability of the reported performance information to determine whether it was valid, accurate and complete.
- 14. The material findings in respect of the usefulness and reliability of the selected objective are as follows:

#### **Programme 2- Core Operations**

#### Performance Indicator 2.6.1: Compliance with the section 77 protocol

- 15. The performance target was reported as "reports to be concluded within five days of resolution of all Section 77 notices." in the annual performance report while the performance target was approved as "all Section 77 Notices resolved in compliance with the Section 77 Protocol" in the annual performance plan, as required by paragraph 3.2 of the FMPPI.
- 16. In addition, the target for this indicator was changed to "reports to be concluded within five days of resolution of all section 77 notices" without necessary approval as required by treasury regulation 29.1.1 and 30.1.
- 17. Furthermore, the target was reported as reports to be concluded within five days of resolution of all section 77 notices while the target was approved as all section 77 notices resolved in compliance with the section 77 protocol in the annual performance plan. This is not in line with the requirements of treasury regulation 28.2.2/30.1.3 (g).
- 18. I was unable to obtain sufficient appropriate evidence for all Section 77 Notices resolved in compliance with the Section 77 Protocol that clearly defined the required level of performance as required by the FMPPI. This was due to performance target not consistent to the desired performance as the technical indicator description in the in the annual performance plan. I was unable to test whether the target for this indicator was clearly defined by alternative means.
- 19. I did not identify any material findings on the usefulness and reliability of the reported performance information for the following programme:
  - ☐ Programme 3 Capacity Building

#### Other matters

20. I draw attention to the matters below.

#### Achievement of planned targets

21. Refer to the annual performance report on pages 20 to 71 for information on the achievement of planned targets for the year and explanations provided for the under/overachievement of a number of targets.

#### Adjustment of material misstatements

22. I identified material misstatements in the annual performance report submitted for auditing. These material misstatements are on the reported performance information of programme 2: Core operations. As management subsequently corrected only some of the misstatements, I raised material findings on the usefulness of the reported performance information.

## Report on audit of compliance with legislation

#### Introduction and scope

- 23. In accordance with the PAA and the general notice issued in terms thereof I have a responsibility to report material findings on the compliance of the public entity with specific matters in key legislation. I performed procedures to identify findings but not to gather evidence to express assurance.
- 24. The material findings in respect of the compliance criteria for the applicable subject matters are as follows:

#### **Budget**

25. Expenditure was incurred in excess of the approved budget, in contravention of section 53(4) of the PFMA.

#### **Annual financial statements**

26. The financial statements submitted for auditing were not prepared in accordance with the prescribed financial reporting framework as required by section 55(1) (a) and (b) of the PFMA. Material misstatements identified by the auditors in the submitted financial statements were corrected, resulting resulting in the financial statements receiving an unqualified audit opinion.

#### **Expenditure management**

- 27. Effective steps were not taken to prevent irregular expenditure amounting to R3 626 303 as disclosed in note 29 to the annual financial statements, as required by section 51(1)(b)(ii) of the PFMA.
- 28. Effective steps were not taken to prevent fruitless and wasteful expenditure amounting to R444 741 as disclosed in note 33 to the annual financial statements, as required by section 51(1)(b)(ii) of the PFMA.

#### Procurement and contract management

- 29. Goods and services with a transaction value below R500 000 were procured without obtaining the required price guotations, as required by Treasury Regulation 16A6.1.
- 30. Sufficient appropriate audit evidence could not be obtained that quotations were awarded to suppliers whose tax matters have been declared by the South African Revenue Services to be in order as required by Treasury Regulations 16A9.1 (d) and the Preferential Procurement Regulations
- 31. Some quotations were awarded to bidders based on evaluation criteria that were not stipulated on the original invitation for quotations, in contravention of Treasury Regulations 16A6.3 (a) and the Preferential Procurement Regulations.
- 32. Some contracts were awarded to bidders that did not score the highest points in the evaluation process, as required by section 2(1)(f) of Preferential Procurement Policy Framework Act and Preferential Procurement Regulations.

#### Other information

- 33. NEDLAC's accounting authority is responsible for the other information. The other information comprises the information included in the annual report which includes the director's report, the audit committee's report and the company secretary's certificate as required by the Companies Act. The other information does not include the separate financial statements, the auditor's report thereon and those selected programmes presented in the annual performance report that have been specifically reported on in the auditor's report.
- 34. My opinion on the financial statements and findings on the reported performance information and compliance with legislation do not cover the other information and I do not express an audit opinion or any form of assurance conclusion thereon.
- 35. In connection with my audit, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the separate financial statements and the selected programmes presented in the annual performance report, or my knowledge obtained in the audit, or otherwise

appears to be materially misstated. If, based on the work I have performed on the other information obtained prior to the date of this auditor's report, I conclude that there is a material misstatement of this other information, I am required to report that fact. I have nothing to report in this regard.

#### Internal control deficiencies

36. I considered internal control relevant to my audit of the financial statements, reported performance information and compliance with applicable legislation; however, my objective was not to express any form of assurance thereon. The matters reported below are limited to the significant internal control deficiencies that resulted in the findings on the annual performance report and the findings on compliance with legislation included in this report.

#### Leadership

- 37. Leadership did not adequately exercise oversight responsibility over financial, compliance and related internal controls to ensure credibility of information submitted for audit.
- 38. Policies and procedures did not adequately guide activities related to preparation of the annual financial statements and effective monitoring of compliance with laws and regulations.

#### **Financial management**

Auditor-General.

- 39. Management's did not implement internal controls relating document management; daily, weekly and monthly reconciliation disciplines and processes over the preparation and presentation of financial statements to ensure that the financial statements were free from material misstatements.
- 40. Non-compliance with laws and regulations could have been prevented had compliance been properly reviewed and monitored and control measures implemented timeously.

Pretoria

31 July 2017

AUDITOR-GENERAL SOUTH AFRICA

Auditing to build public confidence

## Annexure A – Auditor-general's responsibility for the audit

 As part of an audit in accordance with the ISAs, I exercise professional judgement and maintain professional scepticism throughout my audit of the financial statements, and the procedures performed on reported performance information for selected objectives and on the public entity's compliance with respect to the selected subject matters.

#### **Financial statements**

- 41. In addition to my responsibility for the audit of the financial statements as described in the auditor's report, I also:
  - identify and assess the risks of material misstatement of the financial statements whether due to fraud or
    error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is
    sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery,
    intentional omissions, misrepresentations, or the override of internal control.
  - obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
    appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of
    the public entity's internal control.
  - evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the board of directors, which constitutes the accounting authority.
  - conclude on the appropriateness of the board of directors, which constitutes the accounting authority's use of the going concern basis of accounting in the preparation of the financial statements. I also conclude, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Nedlac ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements about the material uncertainty or, if such disclosures are inadequate, to modify the opinion on the financial statements. My conclusions are based on the information available to me at the date of the auditor's report. However, future events or conditions may cause a public entity to cease to continue as a going concern.
  - evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

#### Communication with those charged with governance

- 42. I communicate with the accounting authority regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.
- 43. I also confirm to the accounting authority that I have complied with relevant ethical requirements regarding independence, and communicate all relationships and other matters that may reasonably be thought to have a bearing on my independence and here applicable, related safeguards.

Audited Annual Financial Statement for the year ended 31 March 2017

## **Accounting Authority's Responsibilities and Approval**

The members are required by the Public Finance Management Act (Act 1 of 1999), to maintain adequate accounting records and are responsible for the content and integrity of the audited annual financial statements and related financial information included in this report. It is the responsibility of the members to ensure that the audited annual financial statements fairly present the state of affairs of the entity as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the audited annual financial statements and were given unrestricted access to all financial records and related data.

The audited annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The audited annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The members acknowledge that they are ultimately responsible for the system of internal financial control established by the entity and place considerable importance on maintaining a strong control environment. To enable the members to meet these responsibilities, the accounting authority sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the entity and all employees are required to maintain the highest ethical standards in ensuring the entity's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the entity is on identifying, assessing, managing and monitoring all known forms of risk across the entity. While operating risk cannot be fully eliminated, the entity endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The members are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the audited annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The members have reviewed the entity's cash flow forecast for the 12 months to 31 March 2017 and, in the light of this review and the current financial position, they are satisfied that the entity has or has access to adequate resources to continue in operational existence for the foreseeable future.

The entity is wholly dependent on the Department of Labour for continued funding of operations. The audited annual financial statements are prepared on the basis that the entity is a going concern and that the Department of Labour has neither the intention nor the need to liquidate or curtail materially the scale of the entity.

Although the accounting authority is primarily responsible for the financial affairs of the entity, they are audited by the entity's external auditors.

The audited annual financial statements set out on pages 93 to 141, which have been prepared on the going concern basis.

Mr P M Vilakazi Executive Director

Johannesburg 31 July 2017

Audited Annual Financial Statement for the year ended 31 March 2017

## **Audit and Risk Committee Report**

We are pleased to present our report for the financial year ended 31 March 2017.

#### Audit and Risk Committee members and attendance

The Audit and Risk Committee consists of the members listed hereunder and should meet quarterly as per the approved terms of reference. During the current year, four (4) ordinary meetings were held as follows:

29 April 2016

22 July 2016

19 October 2016

20 January 2017

Name of Member	Number of meetings attended
Adv. Shami Kholong (Independent Chairperson)	4
Mr. Nico Vermuelen(2) and Mr. Sello Rasethaba(1) (Business)	3
Mr. Kugesh Naidoo (Community)	4
Mr. Freddie Petersen (Government)	3
Mr. Chris Klopper (Labour)	1

#### **Audit and Risk Committee responsibility**

The Audit and Risk Committee reports that it has complied with its responsibilities arising from Section 51(1)(a)(ii) and 76(4)(d) of the Public Finance Management Act, 1999 and Treasury Regulation 27.1.

The Audit Committee also reports that it has adopted an appropriate formal terms of reference as its Audit Committee Charter. It has during the year under review regulated its affairs in compliance with this Charter and has discharged all its responsibilities as contained therein and the related accounting policies and practices.

#### Stakeholder Engagement/s

The Committee has been able to engage with the following stakeholders:

- Executive Council (EXCO)
- Management Committee (MANCO)
- Management
- Internal Audit Unit
- Auditor-General of South Africa

#### The Effectiveness of Internal Control

Our review of the findings of the Internal Audit work, which was based on the risk assessments conducted in Nedlac and reported to EXCO of Nedlac, reveals that even though some control weaknesses still remain from the previous reporting period, there has been some improvement during the year under review.

The following internal audit work was completed during the year under review:

No.	Audit Project
1	Supply Chain Management
2	Performance Information
3	Human Capital Management
4	Financial Statement Compliance Review
5	Financial Discipline Review
6	Follow up reviews – Auditor General findings
7	Follow up reviews – Internal Audit Findings
8	Human Capital Management

Audited Annual Financial Statement for the year ended 31 March 2017

#### The following were areas of concern:

During the financial year under review, Management did not always fully implement with the required rigour, numerous material control weakness recommendations from Internal Audit and the Auditor-General. Most of which had been raised before but were not completely resolved. As a result, the Audit and Risk Committee recommends to both Manco and Exco that the Auditor General and Internal Audit action plan should be strictly monitored for implementation in 2017/18 financial year to address all unresolved findings.

The Audit and Risk Committee acknowledges and appreciates, once again, efforts underway by management to address areas of concern raised by combined assurers. Focus should remain on filling key strategic vacancies and on upskilling personnel as and when required.

#### **Risk Management**

Nedlac appears to be evolving in institutionalising risk management in its business processes.

There is a risk register in place. The risk management committee is in place but the Audit Committee did not always receive the reports that evince stringent management of risk. The top ten (10) risks are monitored by the Audit and Risk Committee and EXCO regularly.

Risks pertaining to supply chain management processes and expenditure management have been noted and should be added to the risk register and continuously monitored. Management's assessment of inherent and residual risks continues to appear significantly understated considering the number of high and medium level findings identified during audits.

#### **In-Year Management and Quarterly Report**

Management has reported quarterly as required by the PFMA. In addition at all Audit and Risk Committee meetings management has presented quarterly reports for review and or consideration by the Committee.

#### **Evaluation of Financial Statements**

We reviewed the Annual Financial Statements prepared by management and recommended them for audit by the Auditor General subject to recommended refinements of the Audit Committee being implemented by management.

#### **Evaluation of Performance Information**

We evaluated performance tables and recommended them for audit by the Auditor General subject to recommended refinements of the Audit Committee being implemented by management.

#### **Auditor General's Report**

The Audit and Risk Committee notes the exceptions raised by the Auditor General and management's commitment to addressing these. The Committee further notes the Unqualified Audit Opinion, which is an improvement from the previous year, with matters raised by the Auditor General.

Finally, the Audit and Risk Committee concurs and accepts the conclusions of the Auditor-General on the Annual Financial Statements and is of the opinion that the Audited Annual Financial Statements be accepted and read together with the report of the Auditor-General. The Committee has also reviewed the Performance Information report as included in the Auditor General report together with the management letter, and is of the opinion that the Executive Director of Nedlac should develop a strategy to address all findings contained therein.

Adv. Shami Kholong

**Chairperson of the Audit and Risk Committee** 

Nedlac

31 July 2017

Audited Annual Financial Statement for the year ended 31 March 2017

## **Accounting Authority's Report**

The members submit their report for the year ended 31 March 2017.

#### 1. Review of activities

#### Main business and operations

#### LEGISLATIVE AND OPERATIONAL OVERVIEW

Nedlac's work programme is driven by the legal imperative for social dialogue and participatory policymaking in terms of the Nedlac Act, Act 35 of 1994. In this regard, the Nedlac act requires the institution to:

- Strive to promote the goals of economic growth, participation in economic decision- making and social equity;
- Seek to reach consensus and conclude agreements on matters pertaining to social and economic policy;
- Consider all proposed labour legislation relating to labour market policy before it is introduced in Parliament;
- · Encourage and promote the formulation of coordinated policy on social and economic matters; and
- Consider all significant changes to social and economic policy before it is implemented or introduced in Parliament.
- Consider Socio Economic Disputes in terms of Section 77 of the Labour Relations Act.

The Nedlac work programme is therefore largely shaped by the policy and legislative agenda as determined by the government of the day. The Nedlac work programme is furthermore significantly influenced by global economic conditions and the socioeconomic challenges confronting South Africa. In addition, the social partners also have the right to table issues for consideration. Nedlac is thus confronted with a host of issues on which it is required to engage. This engagement process is undertaken in compliance with the Nedlac Constitution and the Protocol for Tabling Issues at Nedlac. The engine-rooms for engagement are as follows:

#### Public finance and Monetary Policy Chamber

The Public Finance and Monetary Policy Chamber shall seek to reach consensus and make agreements for placing before the executive council on all matters pertaining to financial, fiscal, monetary and exchange rate policies, the coordination of fiscal and monetary policy, related elements of macroeconomic policy and the associated institutions of delivery.

#### Trade and Industry Chamber

The trade and Industry chamber shall seek to reach consensus and make arrangements for placing before the executive council on all matters pertaining to the economic and social dimensions of trade, industrial, mining, agricultural and services policies and the associated institutions of delivery.

#### Labour Market Chamber

The Labour Market chamber shall seek to reach consensus and make arrangements for placing before the executive council on all matters pertaining to the world of work and the associated institutions of delivery.

#### Development Chamber

The Development chamber shall seek to reach consensus and make agreements for placing before the executive council on all matters pertaining to development, both urban and rural, implementation strategies, financing of development programmes, campaigns to mobilise the nation behind government programmes and the associated institutions of delivery.

Net deficit of the entity was R 3,173,121 (2016: deficit R 2,570,086).

#### 2. Going concern

These financial statements have been prepared based on the expectation that the entity will continue to operate as a going concern for at least the next twelve months.

#### 3. Subsequent events

The members are not aware of any matter or circumstance arising since the end of the financial period ended 31 March 2017.

Audited Annual Financial Statement for the year ended 31 March 2017

## **Accounting Authority's Report**

#### 4. Accounting Authority

The Executive Council is the accounting authority as represented by the Overall Convenors. The Overall Convenors during the year and to the date of this report are as follows:

#### Name

Mr. B Ntshalintshali (Labour)

Mr. D Mthalane (Community)

Mr. V Seafield (Government)

Mr. K Moyane (Business)

#### 5. Executive Director

The secretary of the entity is Mr. P M Vilakazi.

#### 6. Key managers emoluments

Details for key managers' emoluments are disclosed in the employee related costs note 15.

#### 7. Auditors

Internal auditors: O.M.A. Chartered Accountants

External auditors: Auditor-General of SA

Audited Annual Financial Statement for the year ended 31 March 2017

### Statement of Comparison of Budget and Actual Amounts

The approved budget for 2016/2017 was prepared on a cash basis and the financial statements were presented on an accrual basis.

### Variance explanations:

- A1 The amount invested in the call account increased during the current financial year due to the increase in the grant received from the department of labour. The other reason for the increase in interest received was due to the fact that there was still unutilised retained surplus remaining on the call account which was higher than what was initially anticipated. There is also an annual increase on the amount that is received as grant which is kept on the call account.
- **A2 -** The variance is due to the fact that there has been less than expected disposal of assets during the 2016/17 financial year. The only other income which has been received relates to the repayment of bursary by the IT Coordinator
- **A3** There was an additional grant received from the Department of Labour to cover the expenditure short fall as a result of the minimum wage task team which was not budgeted for at the beginning of the financial year
- A4 The decrease on the personnel cost is due to a number of vacant positions at Nedlac which were vacant during the 2016/17 financial year. These positions include the position of Head of Programme Operations, Senior TIC Coordinator, Coordinator for Labour Constituency and SCM coordinator
- **A5** The variance on depreciation is due to assets that capitalised and also by the change in estimate of useful life and the residual value from R 0.00 to R 2 700 000 on Nedlac building which was caused by the reassessment conducted by the independent valuator during 2016/17 financial year
- **A6** Variance not material.
- A7 The expense for leases was budgeted under other expenses and not as its own line item.
- **A8 -** The expense for leases of printers and photocopiers was budgeted under other expenses and not as its own line item. Some unexpected expenses accrued during the year with regard to the minimum wage discussion which were not budgeted for but contributed to the increase in this expense line item.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Accounting Policies**

### 1. Presentation of Audited Annual Financial Statements

The audited annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 91(1) of the Public Finance Management Act (Act 1 of 1999).

These audited annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these audited annual financial statements, are disclosed below.

### 1.1 Significant judgements and sources of estimation uncertainty

In preparing the audited annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the audited annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the audited annual financial statements. Significant judgements include:

### Trade receivables / Held to maturity investments and/or loans and receivables

The entity assesses its trade receivables, held to maturity investments and loans and receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the surplus makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables, held to maturity investments and loans and receivables is calculated on a portfolio basis, based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to loan balances in the portfolio and scaled to the estimated loss emergence period.

### Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value in use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the assets will remain in use for the next 12 months however the assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of goodwill and tangible assets.

The entity reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. In addition, goodwill is tested on an annual basis for impairment. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time.

### **Provisions**

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 9 - Provisions.

### Allowance for doubtful debts

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

Bad debts must only be written off on the authority of Manco, subject to the recommendation of the Finance Committee, after all reasonable steps have been taken to recover the debt and it is satisfied that:

- The debtor cannot be traced;
- All legal and other measures have been exhausted;
- Recovery of the debt would be uneconomical;
- Recovery would cause undue hardship to the debtor or his/her dependants;
- It would be an advantage to Nedlac to effect a settlement of its claim or to waive the claim.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Accounting Policies**

### 1.2 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one reporting period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the entity; and
- the cost or fair value of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or assets, or a combination of assets and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

ItemAverage useful lifeBuildings35 yearsFurniture and fixtures14-25 yearsMotor vehicles15-22 yearsOffice equipment4-15 yearsIT equipment3-20 years

### 1.3 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the entity or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the entity; and
- the cost or fair value of the asset can be measured reliably.

Intangible assets are initially recognised at cost.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Accounting Policies**

### 1.3 Intangible assets (continued)

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

ItemUseful lifeComputer software, other10 years

### 1.4 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

A concessionary loan is a loan granted to or received by an entity on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types
  of contracts that would be expected to have a similar response to changes in market factors.
- It is settled at a future date.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another entity; or
- a contractual right to:
  - receive cash or another financial asset from another entity: or
  - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial liability is any liability that is a contractual obligation to:

Audited Annual Financial Statement for the year ended 31 March 2017

### **Accounting Policies**

### 1.4 Financial instruments (continued)

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- · the entity designates at fair value at initial recognition; or
- are held for trading.

### Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class Category

Trade and other receivables Cash and cash equivalents

Financial asset measured at amortised cost Financial asset measured at cost

The entity has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class Category

Other receivables Financial liability measured at amortised cost

### Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

### Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

### Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

### Reclassification

The entity does not reclassify a financial instrument while it is issued or held unless it is:

- combined instrument that is required to be measured at fair value; or
- an investment in a residual interest that meets the requirements for reclassification.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Accounting Policies**

### 1.5 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

### Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

### Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Income for leases is disclosed under revenue in statement of financial performance.

### Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term.

The current operating leases do not have escalations and therefore have not been straight lined.

### 1.6 Impairment of cash-generating assets

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the entity; or
- (b) the number of production or similar units expected to be obtained from the asset by the entity.

Criteria developed by the entity to distinguish cash-generating assets from non-cash-generating assets are as follow:

Audited Annual Financial Statement for the year ended 31 March 2017

### **Accounting Policies**

### 1.6 Impairment of cash-generating assets (continued)

### Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The entity assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the entity estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also test a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

### 1.7 Share capital / contributed capital

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

### 1.8 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

### Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the
  absences is due to be settled within twelve months after the end of the reporting period in which the employees
  render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting
  period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the
  undiscounted amount of the benefits, the entity recognise that excess as an asset (prepaid expense) to the extent
  that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognise the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Accounting Policies**

### 1.9 Provisions and contingencies

Provisions are recognised when:

- the entity has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the entity settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating surplus.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
  - the activity/operating unit or part of an activity/operating unit concerned;
  - the principal locations affected;
  - the location, function, and approximate number of employees who will be compensated for services being
  - terminated;
  - the expenditures that will be undertaken; and
  - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that
  plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the entity

No obligation arises as a consequence of the sale or transfer of an operation until the entity is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 25.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Accounting Policies**

### 1.9 Provisions and contingencies (continued)

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The entity recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

Determining whether an outflow of resources is probable in relation to financial guarantees requires judgement. Indications that an outflow of resources may be probable are:

- financial difficulty of the debtor;
- defaults or delinquencies in interest and capital repayments by the debtor;
- breaches of the terms of the debt instrument that result in it being payable earlier than the agreed term and the ability of the debtor to settle its obligation on the amended terms; and
- a decline in prevailing economic circumstances (e.g. high interest rates, inflation and unemployment) that impact on the ability of entities to repay their obligations.

Where a fee is received by the entity for issuing a financial guarantee and/or where a fee is charged on loan commitments, it is considered in determining the best estimate of the amount required to settle the obligation at reporting date. Where a fee is charged and the entity considers that an outflow of economic resources is probable, an entity recognises the obligation at the higher of:

- the amount determined using in the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets;
- the amount of the fee initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the Standard of GRAP on Revenue from Exchange Transactions.

### 1.10 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

### Measurement

Revenue is measured at the fair value of the consideration received or receivable.

### Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the entity;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

### 1.11 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by an entity, which represents an increase in net assets, other than increases relating to contributions from owners.

Control of an asset arise when the entity can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Accounting Policies**

### 1.11 Revenue from non-exchange transactions (continued)

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, an entity either receives value from another entity without directly giving approximately equal value in exchange, or gives value to another entity without directly receiving approximately equal value in exchange.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

### Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

### Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the entity.

When, as a result of a non-exchange transaction, the entity recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

### 1.12 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use of sale.

Borrowing costs are recognised as an expense in the period in which they are incurred.

### 1.13 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

### 1.14 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.15 Irregular expenditure

Irregular expenditure as defined in section 1 of the PFMA is expenditure other than unauthorised expenditure, incurred in contravention of or that is not in accordance with a requirement of any applicable legislation, including -

- (a) this Act; or
- (b) the State Tender Board Act, 1968 (Act No. 86 of 1968), or any regulations made in terms of the Act; or
- (c) any provincial legislation providing for procurement procedures in that provincial government.

National Treasury practice note no. 4 of 2008/2009 which was issued in terms of sections 76(1) to 76(4) of the PFMA requires the following (effective from 1 April 2008):

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Accounting Policies**

### 1.15 Irregular expenditure (continued)

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

### 1.16 Budget information

Entity are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 1 April 2016 to 31 March 2017.

The budget for the economic entity includes all the entities approved budgets under its control.

The audited annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Notes to the Audited Annual Financial Statements**

### 2. New standards and interpretations

### 2.1 Standards and interpretations issued, but not yet effective

The entity has not applied the following standards and interpretations, which have been published and are mandatory for the entity's accounting periods beginning on or after 01 April 2017 or later periods:

### **GRAP 18: Segment Reporting**

Segments are identified by the way in which information is reported to management, both for purposes of assessing performance and making decisions about how future resources will be allocated to the various activities undertaken by the entity. The major classifications of activities identified in budget documentation will usually reflect the segments for which an entity reports information to management.

Segment information is either presented based on service or geographical segments. Service segments relate to a distinguishable component of an entity that provides specific outputs or achieves particular operating objectives that are in line with the entity's overall mission. Geographical segments relate to specific outputs generated, or particular objectives achieved, by an entity within a particular region.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions, states that no comparative segment information need to be presented on initial adoption of this Standard.

Directive 3 - Transitional provisions for high capacity municipalities states that no comparative segment information need to be presented on initial adoption of the Standard. Where items have no been recognised as a result of transitional provisions under the Standard of GRAP on Property, Plant and Equipment, recognition requirements of this Standard would not apply to such items until the transitional provision in that Standard expires.

Directive 4 – Transitional provisions for medium and low capacity municipalities states that no comparative segment information need to be presented on initial adoption of the Standard. Where items have not been recognised as a result of transitional provisions un the Standard of GRAP on Property, Plant and Equipment and the Standard of GRAP on Agriculture, the recognition requirements of the Standard would not apply to such items until the transitional provision in that standard expires.

The effective date of the standard is for years beginning on or after 01 April 2016.

The entity has adopted the standard for the first time in the 2017 audited annual financial statements.

### GRAP 107: Mergers

The objective of this Standard is to establish accounting principles for the acquirer in a transfer of functions between entities not under common control. It requires an entity that prepares and presents financial statements under the accrual basis of accounting to apply this Standard to a transaction or other event that meets the definition of a transfer of functions. It includes a diagram and requires that entities consider the diagram in determining whether this Standard should be applied in accounting for a transaction or event that involves a transfer of functions or merger.

It furthermore covers Definitions, Identifying a transfer of functions between entities not under common control, The acquisition method, Recognising and measuring the difference between the assets acquired and liabilities assumed and the consideration transferred, Measurement period, Determining what is part of a transfer of functions, Subsequent measurement and accounting, Disclosure, Transitional provisions as well as the Effective date of the standard.

The effective date of the standard is for years beginning on or after 01 April 2016.

The entity expects to adopt the standard for the first time in the 2017 audited annual financial statements.

### GRAP 20: Related parties

The objective of this standard is to ensure that a reporting entity's audited annual financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Notes to the Audited Annual Financial Statements**

### 2. New standards and interpretations (continued)

An entity that prepares and presents financial statements under the accrual basis of accounting (in this standard referred to as the reporting entity) shall apply this standard in:

- identifying related party relationships and transactions;
- identifying outstanding balances, including commitments, between an entity and its related parties;
- identifying the circumstances in which disclosure of the items in (a) and (b) is required; and
- determining the disclosures to be made about those items.

This standard requires disclosure of related party relationships, transactions and outstanding balances, including commitments, in the consolidated and separate financial statements of the reporting entity in accordance with the Standard of GRAP on Consolidated and Separate Financial Statements. This standard also applies to individual audited annual financial statements.

Disclosure of related party transactions, outstanding balances, including commitments, and relationships with related parties may affect users' assessments of the financial position and performance of the reporting entity and its ability to deliver agreed services, including assessments of the risks and opportunities facing the entity. This disclosure also ensures that the reporting entity is transparent about its dealings with related parties.

The standard states that a related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. As a minimum, the following are regarded as related parties of the reporting entity:

- A person or a close member of that person's family is related to the reporting entity if that person:
- has control or joint control over the reporting entity;
- has significant influence over the reporting entity;
- is a member of the management of the entity or its controlling entity.
- An entity is related to the reporting entity if any of the following conditions apply:
- -the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others);
- -one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member);
- -both entities are joint ventures of the same third party;
- -one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
- -the entity is a post-employment benefit plan for the benefit of employees of either the entity or an entity related to the entity. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity;
- -the entity is controlled or jointly controlled by a person identified in (a); and
- -a person identified in (a)(i) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

The standard furthermore states that related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

The standard elaborates on the definitions and identification of:

Close member of the family of a person;

Audited Annual Financial Statement for the year ended 31 March 2017

### **Notes to the Audited Annual Financial Statements**

### 2. New standards and interpretations (continued)

- Management;
- Related parties;
- Remuneration; and
- Significant influence

The standard sets out the requirements, inter alia, for the disclosure of:

- Control;
- Related party transactions; and
- Remuneration of management

The effective date of the standard is for years beginning on or after 01 April 2016.

The entity expects to adopt the standard for the first time in the 2017 audited annual financial statements.

The entity does not envisage the adoption of the standard until such time as it becomes applicable to the entity's operations.

GRAP108: Statutory Receivables

The objective of this Standard is: to prescribe accounting requirements for the recognition, measurement, presentation and disclosure of statutory receivables.

It furthermore covers: Definitions, recognition, derecognition, measurement, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The entity expects to adopt the standard for the first time when the Minister set the effective date for the standard.

The effective date of the standard is for years beginning on or after 01 April 2016.

The entity expects to adopt the standard for the first time in the 2017 audited financial statements.

The entity does not envisage the adoption of the standard until such time as it becomes applicable to the entity's operations.

Directive 11 Changes in measurement bases following the initial adoption of Standards of GRAP

The objective of this Directive is to permit an entity to change its measurement bases following the initial adoption of Standards of GRAP. The change is based on the principles in the Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors. This Directive should therefore be read in conjunction with the Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors.

In applying paragraph 13(b) of the Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors, this Directive allows an entity, that has initially adopted the fair value model for investment property or the revaluation model for property, plant and equipment, intangible assets or heritage assets, to change its accounting policy on a once-off basis to the cost model when the entity elects to change its accounting policy following the initial adoption of these Standards of GRAP. The once-off change will be allowed when the entity made an inappropriate accounting policy choice on the initial adoption of the Standards of GRAP.

Subsequent to the application of this Directive, an entity will be allowed to change its accounting policy in future periods subject to it meeting the requirements in the Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Notes to the Audited Annual Financial Statements**

### 2. New standards and interpretations (continued)

The effective date of the standard is for years beginning on or after 01 April 2016.

The entity expects to adopt the standard for the first time in the 2017 audited annual financial statements.

The entity does not envisage the adoption of the standard until such time as it becomes applicable to the entity's operations.

### **GRAP 32: Service Concession Arrangements: Grantor**

The objective of this Standard is: to prescribe the accounting for service concession arrangements by the grantor, a public sector entity.

It furthermore covers: Definitions, recognition and measurement of a service concession asset, recognition and measurement of liabilities, other liabilities, contingent liabilities, and contingent assets, other revenues, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The entity has adopted the standard for the first time when the Minister sets the effective date for the standard.

The impact of the standard is set out in note Changes in Accounting Policy.

### **GRAP 108: Statutory Receivables**

The objective of this Standard is: to prescribe accounting requirements for the recognition, measurement, presentation and disclosure of statutory receivables.

It furthermore covers: Definitions, recognition, derecognition, measurement, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The entity has adopted the standard for the first time when the Minister sets the effective date for the standard.

The impact of the standard is set out in note Changes in Accounting Policy.

### IGRAP 17: Service Concession Arrangements where a Grantor Controls a Significant Residual Interest in an Asset

This Interpretation of the Standards of GRAP provides guidance to the grantor where it has entered into a service concession arrangement, but only controls, through ownership, beneficial entitlement or otherwise, a significant residual interest in a service concession asset at the end of the arrangement, where the arrangement does not constitute a lease. This Interpretation of the Standards of GRAP shall not be applied by analogy to other types of transactions or arrangements.

A service concession arrangement is a contractual arrangement between a grantor and an operator in which the operator uses the service concession asset to provide a mandated function on behalf of the grantor for a specified period of time. The operator is compensated for its services over the period of the service concession arrangement, either through payments, or through receiving a right to earn revenue from third party users of the service concession asset, or the operator is given access to another revenue-generating asset of the grantor for its use.

Before the grantor can recognise a service concession asset in accordance with the Standard of GRAP on Service Concession Arrangements: Grantor, both the criteria as noted in paragraph .01 of this Interpretation of the Standards of GRAP need to be met. In some service concession arrangements, the grantor only controls the residual interest in the service concession asset at the end of the arrangement, and can therefore not recognise the service concession asset in terms of the Standard of GRAP on Service Concession Arrangements: Grantor.

A consensus is reached, in this Interpretation of the Standards of GRAP, on the recognition of the performance obligation and the right to receive a significant interest in a service concession asset.

The effective date of the standard is not yet set by the Minister of Finance.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Notes to the Audited Annual Financial Statements**

### 2. New standards and interpretations (continued)

The entity has adopted the standard for the first time when the Minister sets the effective date for the standard.

The impact of the standard is set out in note Changes in Accounting Policy.

### GRAP 16 (as amended 2015): Investment Property

Based on the feedback received as part of the post-implementation review, the Board agreed to reconsider certain principles in GRAP 16 and GRAP 17. In particular, the Board agreed to:

- Review the principles and explanations related to the distinction between investment property and property, plant and equipment.
- Consider whether an indicator-based assessment of useful lives of assets could be introduced.
- Clarify the wording related to the use of external valuers.
- Introduce more specific presentation and disclosure requirements for capital work-in-progress.
- Review the encouraged disclosures and assess whether any should be made mandatory or deleted.
- Require separate presentation of expenditure incurred on repairs and maintenance in the financial statements.

Various amendments were made to the Standard, affecting Definitions, Identification, Disclosure, Effective date and Transitional provisions.

The effective date of the standard is for years beginning on or after 01 April 2016.

The entity has adopted the standard for the first time in the 2017 audited annual financial statements.

The impact of the standard is set out in note Changes in Accounting Policy.

### GRAP 17 (as amended 2015): Property, Plant and Equipment

Based on the feedback received as part of the post-implementation review, the Board agreed to reconsider certain principles in GRAP 16 and GRAP 17. In particular, the Board agreed to:

- Review the principles and explanations related to the distinction between investment property and property, plant and equipment.
- · Consider whether an indicator-based assessment of useful lives of assets could be introduced.
- Clarify the wording related to the use of external valuers.
- Introduce more specific presentation and disclosure requirements for capital work-in-progress.
- Review the encouraged disclosures and assess whether any should be made mandatory or deleted.
- Require separate presentation of expenditure incurred on repairs and maintenance in the financial statements.

Amendments identified as part of the post-implementation review, affected the following areas:

- · Indicator-based assessment of the useful lives of assets
- Use of external valuers
- Encouraged disclosures
- Capital work-in-progress
- Expenditure incurred on repairs and maintenance

The effective date of the standard is for years beginning on or after 01 April 2016.

The entity has adopted the standard for the first time in the 2017 audited annual financial statements.

The impact of the standard is set out in note Changes in Accounting Policy.

Figures in Rand	2017	2016
3. Cash and cash equivalents		
Cash and cash equivalents consist of:		
Cash on hand	1,827	3,529
Bank balances	412,913	338,372
Short-term deposits	4,557,506	6,093,298
	4,972,246	6,435,199

### Credit quality of cash at bank and short term deposits, excluding cash on hand

The credit quality of cash at bank and short term deposits, excluding cash on hand that are neither past due nor impaired can be assessed by reference to external credit ratings (if available) or historical information about counterparty default rates:

### **Bank Overdraft**

The bank overdraft is due to debit orders transactions which were not included on the total amount of transfer from call account to current account.

Nedlac does not have approved overdraft facilities and accordingly there are no any unused bank overdraft facilities.

None of Nedlac's assets have been pledged as collateral of any kind.

### 4. Receivables from exchange transactions

Other receivable	1,883,248	1,971,232
Short term portion - CONSAWU debtor	130,000	-

Land		
- Purchase price:	1,500,000	1,500,000
	1,500,000	1,500,0

### Change in estimate

During the year, total estimated useful life of building was increased from 20 years to 35 years with the residual value increasing from R 0 to R 2 700 000. This led to a reduction in depreciation for the year ended 31 March 2017 of R 517 634 with a reduction in future deprecation of R 2 182 366.

During the year an independent property evaluator, valued the land and building at a market value of R 25 400 000 as at 31 March 2017. Fair value for land and building is calculated using the direct income capitalization method, which results in these measurements being classified as Level 3 in the fair value hierarchy. In applying the direct income capitalization method the stabilized net operating income of the property is divided by an appropriate capitalization rate.

Capitalization rate is based on actual location, size and quality of the property and taking into account any available market date at the valuation date.

Stabilized net operating income is revenue less property operating expenses adjusted for items such as average lease up costs, long-term vacancy rates, non-recoverable capital expenditures, management fees, straight-line rents and other non-recurring items.

Fair value is based on the highest and best use basis.

### 6. Intangible assets

		2017			2016	
	Cost / Valuation	Accumulated C amortisation and accumulated impairment	arrying value	Cost / Valuation	Accumulated amortisation and accumulated impairment	Carrying value

Audited Annual Financial Statement for the year ended 31 March 2017

### Notes to the Audited Annual Financial Statements

Figures in Rand	2017	2016

### 7. Long-term debtor

The debtor relates to the amount owed by Consawu as tax bill of costs resulting of the court judgement which was in favour of Nedlac. The total amount outstanding as at 31 March 2017 amounts to R429 609. The current portion of this amount which will be received during the next 12 months is R120 000 this amount has been included in accounts receivable under current assets. The remaining portion of R309 608 (being long-term debtor) will be received during the period commencing 01 April 2018 up to 31 March 2024.

### 8. Payables from exchange transactions

Trade payables	124,653	967,243
Payroll accruals	43,619	189,975
Other accrued expenses	1,182,302	202,053
	1,350,574	1,359,271

### 9. Provisions

### Reconciliation of provisions - 31 March 2017

	Opening Balance	Additions	Utilised during the year	Reversed during the year	Total
Bonus provision	667,598	923,058	(650,738)	(16,860)	923,058
Leave pay provision	359,871	369,532	(37,600)	_	691,803
	1,027,469	1,292,590	(688,338)	(16,860)	1,614,861

### Reconciliation of provisions - 31 March 2016

	Opening Balance	Additions	Utilised during the year	Reversed during the year	Total
Bonus provision	679,295	667,599	(662,396)	(16,900)	667,598
Leave pay provision	354,614	359,871	(76,774)	(277,840)	359,871
	1,033,909	1,027,470	(739,170)	(294,740)	1,027,469

A bonus provision was raised due to the implementation of a performance management system at Nedlac. The final bonus amount will be calculated on the individual staff members' performance scorecard and is expected to be paid after the release of the audited financial statements.

The current leave pay accrual is based on the liability for the current leave cycle not utilised.

### 10. Borrowings

### Long term borrowings

The amount of R168 172 was deposited to the Nedlac bank account by Mrs Mkhize who is the wife of Mr H Mkhize. The amount has been disclosed under other payables as there is no supporting documents to clear it, also due to the fact that Mrs Mkhize was never recorded as a debtor of Nedlac. It is assumed that the deposit might relate to the undergoing forensic investigation matter, this deposit has not been paid back to Mrs Mkhize due to the fact that the forensic investigation matter is still under investigation by the South African Police Services and the National Prosecuting Authority.

### Short term borrowings

Long term borrowings of R168 172 was previously classified as short term borrowings, however it has been reclassified to long term borrowings based on past experience as the matter arose in 2015 and as at 31 March 2017 it is unlikely to be resolved within the next 12 months. It is assumed that the deposit might relate to the undergoing forensic investigation matter, this deposit has not been paid back to Mrs Mkhize due to the fact that the forensic investigation matter is still under investigation by the South African Police Services and the National Prosecuting Authority.

(Loss) / gain on sale of assets	15,461	-
Depreciation and amortisation	1,148,000	1,613,335
Adjustments for:		
Deficit	(3,173,121)	(2,570,087)

Audited Annual Financial Statement for the year ended 31 March 2017

### **Notes to the Audited Annual Financial Statements**

Figures in Rand	2017	2016
24. Commitments		
Authorised capital expenditure		
Already contracted for but not provided for • Property, plant and equipment (ICON Business Furniture)	684,458	
Total capital commitments Already contracted for but not provided for	684,458	_
Authorised operational expenditure		
Already contracted for but not provided for		
<ul> <li>Internal audit fees</li> <li>Unified email management solution (Mimecast)</li> <li>Vox Telecom voice and data</li> <li>Security Services</li> <li>Photocopying and Printing Costs</li> <li>Insurance</li> </ul>	1,193,349 181,730 253,836 31,170 118,223 84,370	220,807 - - - 353,049 50,622
<ul> <li>Legal fees</li> <li>Website and internet fees</li> </ul>	- 1,044	102,620 625,104
	1,863,722	1,352,202
Total operational commitments		
Already contracted for but not provided for	1,863,722	1,352,202

This committed expenditure relates to operating expenses and will be financed by available bank facilities, retained surpluses, existing cash resources and funds internally generated, etc.

As at 31 March 2017 the contractual commitments exceeding a period of 12 months related to printing costs and internal auditing amounts to R795 927.

### 25. Contingencies

In accordance with section 53(3) of the PFMA of 1999, as amended, states that: a Schedule 3 public entity may not budget for a deficit and may not accumulate surpluses, unless the prior written approval of the National treasury has been obtained. Permission has been requested to retain the unused accumulated surplus for the year ended 31 March 2017. Accumulated surplus of R22,153,087 as at 31 March 2017 (31 March 2016: R25,326,208), some of the funds will be used to fund commitments as disclosed in note 24.

### **CCMA Award:**

CCMA in 2012 awarded had awarded a Nedlac former employee an Award to the value of R462, 000.00 for the unfair dismissal which took place in 2010. However Nedlac took the CCMA award for review before it could be finalised the matter became prescribed in March 2015 in terms of the Prescription Act.

On the meeting of Management Committee held on the 24th of March 2016 management was requested to obtain documents with reasons that informed Nedlac's decision to apply for review of the award and the costs incurred in the process.

On 4 October 2016, Ms Lithebe's attorneys indicated that she would not accept the proposed settlement, and counter proposed that Nedlac pay Ms Lithebe R942, 000.00 in settlement of the dispute.

A further offer of R800, 000.00 was made to the attorneys of Ms Lithebe in full and final settlement of the dispute in January 2017. This offer was rejected by Ms Lithebe on 23 January 2017 in light of the Constitutional Court judgement on the prescription of arbritration awards that was handed down in December 2016. Ms Lithebe attorneys indicated that they would proceed with the Rule 11 application to dismiss the review application. Ms Lithebe's attorneys made an additional counter proposal of R 2 million to settle the matter.

As at 31 March 2017 Nedlac has rejected the additional counter proposal of R 2 million.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Notes to the Audited Annual Financial Statements**

Figures in Rand	2017	2016

### 25. Contingencies (continued)

As at 31 March 2017 two seperate matters are presently before the Labour Court:

- 1. Nedlac's application to review and set aside the arbitration award; and the estimated legal costs as at 31 March 2017 on this matter is R 179 400.00 excluding VAT and R 204 516.00 including VAT; and
- 2. Ms Lithebe's application to dismiss the review application and the estimated legal costs as at 31 March 2017 on this matter is R 142,200.00 excluding VAT and R 162,108.00 including VAT.

### **AVTECH Resourcing (PTY) LTD**

AVTECH Resourcing (PTY) LTD has lodged a claim of R119, 700.00 during the current financial year for the recruitment fees relating to the appointment of the temporal staff member that was recruited as a temp. AVTECH Resourcing (PTY) LTD has lodged the claim due to the fact they believe that the staff member was eventually recruited for a permanent position. As at 31 March 2017 the matter is still being assessed by Nedlac legal representatives.

As at 31 March 2017 future legal costs on this matter cannot be estimated due to uncertainty on future events on the matter.

### The Forum Company

The Forum Company has lodged a claim against Nedlac during the current financial year to the value of R226, 922.70. The claim is arising from the cancellation of the booking that was made in July 2016 to make use of the venue in September 2016 for the 2016 Nedlac Summit which was cancelled due to security requirements which were not met by the service provider (the Forum Company).

As at 31 March 2017 the matter is still being assessed by Nedlac legal representatives.

As at 31 March 2017 future legal costs on this matter cannot be estimated due to uncertainty on future events on the matter.

### 26. Risk management

### Financial risk management

Financial risk management
The entity's activities expose to the following financial risks:
Cash flow interest rate risk (Market risk)
Credit risk
Liquidity risk

The Accounting Authority and the Executive Director have overall responsibility for the establishment and oversight of Nedlac's risk management framework. Nedlac's risk management policies are established to identify and analyse the risks faced by Nedlac, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and Nedlac's activities. Nedlac, through its training and management standards and procedures, aims to develop a disciplined and constructive environment in which all employees understand their roles and obligations.

### Liquidity risk

Liquidity risk is the risk that Nedlac will encounter difficulty in raising funds to meet its commitments. Nedlac's approach to managing liquidity is to ensure as far as possible that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to Nedlac's reputation. The bulk portion of the surplus is carried as cash or cash equivalents.

The ageing of trade payables from exchange transactions at the reporting date is per the table below. The amounts disclosed are contractual cash flows.

At 31 March 2017	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Trade and other payables	1,350,573	-	-	-
At 31 March 2016	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Trade and other payables	1,359,271	-	-	-

Audited Annual Financial Statement for the year ended 31 March 2017

### **Notes to the Audited Annual Financial Statements**

Figures in Rand	2017	2016

### 26. Risk management (continued)

### Credit risk

Credit risk is the risk that the counterparty to a financial instrument will default on its obligation to Nedlac, thereby causing financial loss. It is Nedlac's policy that all customers who wish to trade on credit terms are assessed for credit worthiness. In addition, receivable balances are monitored on an ongoing basis with the result that the exposure to bad debts is not significant. A provision is made for doubtful debts. The maximum exposure to credit risk is represented by the carrying value of each financial asset in the statement of financial position.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	31 March 2017	31 March 2016
Cash and cash equivalents	4,972,246	6,435,199
Receivables from exchange transactions	162,016	128,324
Receivables from exchange transactions (long-term debtor)	309,609	429,609

### Market risk

### Interest rate risk

As the entity has no significant interest-bearing assets, the entity's income and operating cash flows are substantially independent of changes in market interest rates.

### 27. Going concern

The financial statements have been prepared on the basis of accounting policies applicable to a going concern. Funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

### 28. Events after the reporting date

Disclose for each material category of non-adjusting events after the reporting date:

- nature of the event.
- estimation of its financial effect or a statement that such an estimation cannot be made.

### 29. Irregular expenditure

Opening balance Add: Irregular Expenditure - current year Add: Expenditure incurred in excess of Approved Budget Add: Non Compliance with Tax Clearance and Three Quotations Requirement Less: Amounts condoned	8,497,269 2,186,751 1,439,552 (8,497,269)	7,010,925 4,007,707 - (2,521,363)
Analysis of expenditure awaiting condonation per age classification  Current year	3,626,303	<b>8,497,269</b> 4,007,707

In the previous financial year the Accounting Authority requested the National Treasury to condone the irregular expenditure. The major portion of the irregular expenditure relates to travel and accommodation where three quotations were used instead of going through the tender process.

The major portion of the irregular expenditure for 2016/17 financial year relates to lack of Tax Clearance Certificates, non compliance with three quotations requirements and the over expenditure on the 2016/17 annual budget.

### 30. Reconciliation between budget and cash flow statement

Reconciliation of budget surplus/deficit with the net cash generated from operating, investing and financing activities:

Audited Annual Financial Statement for the year ended 31 March 2017

### **Notes to the Audited Annual Financial Statements**

Figures in Rand	2017	2016
30. Reconciliation between budget and cash flow statement (continued)		
Operating activities Actual amount as presented in the budget statement	(1,344,661)	645,284
Investing activities Actual amount as presented in the budget statement	(118,290)	(1,741,717)
Net cash generated from operating, investing and financing activities	(1,462,951)	(1,096,433)

### 31. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting authority and includes a note to the audited annual financial statements. Travel and accommodation and recruitment services procured during the previous financial years and the process followed in procuring this service deviated from the provisions of paragraph 12(1)(d)(i) as stated above. The reasons for these deviations were documented and will be reported to the accounting authority on the 31 May 2017 for approval.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Notes to the Audited Annual Financial Statements**

Figures in Rand	2017	2016

### 32. Related parties

Nedlac operates in an economic sector currently dominated by entities directly or indirectly owned by South African Government. As a consequence of constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Management are those responsible for planning, directing and controlling the activities of the entity. All individuals from the level of managers up to the members of the accounting authority are considered management.

Close family members of key management are considered to be those family members who may be expected to influence, or be influenced by key management individuals or other parties related to the entity.

Relationships

Public entity Proudly South African
Department of Labour

Members of key management M Vilakazi
M Daza

N Sibisi

Proudly South Africa was formed by Nedlac. Some of the EXCO members of Nedlac also form part of the board members of Proudly South Africa. Nedlac is also responsible for the appointment of the chairperson of the board of directors for Proudly South Africa.

Add: Fruitless and wasteful expenditure – current year	444,741	446,277
	1,582,121	1,137,380

### Current year

Costs related to travel not utilised due to unforeseen circumstances, penalties for late filing as well as debit orders for cell phone lines which were terminated by Nedlac but Vodacom and MTN still continued with debit orders.

Audited Annual Financial Statement for the year ended 31 March 2017

### **Notes to the Audited Annual Financial Statements**

Figures in Rand	2017	2016

### 34. Prior period errors

### Description of prior period errors

### Fruitless and wasteful expenditure

The fruitless and wastefull expenditure relates to debit orders charged by Vodacom and MTN for the contracts that were terminated during the 2014/15 financial year. The contracts were terminated however Vodacom and MTN continued to charge NEDLAC through debit orders untill 31 March 2017. A number of notifications were send to both Vodacom and MTN to terminate the debit orders, however NEDLAC was not successful. The adjustment for the opening balance for the 2015/16 financial year amounted to R 8,820 and the adjustment to the additions for the 2015/16 financial year amounted to R 321,833.

### 35. Operating lease

Minimum lease payments due - within one year - in second to fifth year inclusive	146,090 48,697	146,090 206,959
Present value of minimum lease payments	194,787	353,049
Non-current liabilities Current liabilities	146,090 48,697	206,959 146,090
	194,787	353,049

The entity acquired photocopier machines by entering into a 36 month operating lease agreement with Konica Minolta South Africa (Pty) Ltd on 01 August 2015. The full contract value amounts to R 438 268,68. The operating lease expires on 31 July 2018.
